Certificate II in HORTICULTURE

Did you know that Horticulture is one of the fastest growing industries in Australia? Learn about the modern technologies that are changing the way we grow plants of all kinds.

This course at CCG will give you the skills to start your career working in commercial food production, local government parks and gardens and retail nurseries.

You will learn how to work in hot-houses with the latest technology, construct and maintain gardens, test soil, operate machinery, and identify pests and diseases in plants. It is a great opportunity to be a part of the exciting changes in food and plant production.
